

# Qolcom Host

## Ultra-Secure private hosting for your Enterprise Mobility Management platform and Wi-Fi system

### OVERVIEW

Qolcom is a leading UK based integrator of secure wireless network and Enterprise Mobility Management solutions and is the exclusive UK member of the Global Enterprise Mobility Alliance (GEMA).

Working closely with GEMA partners, Qolcom makes mobile services simple, reliable and unified enabling organisation to work everywhere at any time. Following the rapid proliferation of Wi-Fi, smart phones and tablets, Qolcom understands that many organisations struggle with enforcing security policy, productiveness, continual software updates and controlling mobile access to resources.

#### Qolcom and The Bunker in Partnership

Qolcom partnered with The Bunker secure data centre to enable fully scalable hosted, wireless and Managed Mobility services in a highly secure environment with instant availability. This is achieved through a unique blend of Private Hosting Infrastructure delivered on dedicated hardware with the following compliancy: the UK Government’s Communications Electronics Security Group (CESG) standard for Information Security, SC, NPPV checked, ISO 27001, PCI DSS V3.0, IGSoc and G-Cloud certified.

Qolcom and The Bunker address the needs of the increasingly mobile landscape. With Wi-Fi becoming more intelligent, controllers and proxy appliances are securely enabled to be deployed on virtualised resources that use the hosted model to overcome the strain on in-house IT capabilities.

What’s more, as each hosted mobility management solution calls for a bespoke environment with a specific number of virtual machines (VMs), load balancers and firewalls, the hosted infrastructure offered by The Bunker can change and flex with your needs.

**Bespoke Hosted Wi-Fi and Enterprise Mobility:**  
Individually tailored platform to meet customer requirements

**Scaleable and flexible:**  
Private hosting to enable expansion of customer base and global partnership support

**Ultra-Secure:**  
Incorporating digital, human and physical security process wrapped within a governance and standards layer

### Qolcom and The Bunker delivers:

- Ready-made platform ensures rapid customer on-boarding
- Tailored bespoke platform to meet customer requirements no matter how big or small
- Dedicated resources guarantee confidentiality, integrity and availability of applications and data, with CESG compliancy and UK data sovereignty assured
- Onsite or offsite hosting and remote management allows our customers to rely on our EMM and/or Wi-Fi Management platforms for critical security and policy enforcement without the need for any additional staff
- Systems are built in-house ensuring ultra-security from the source code up
- Ultra-resilient, redundant and multi-homed gigabit network managed 24/7/365 by highly skilled networks team
- Disaster Recovery (DR) makes designing, deploying and managing a DR plan less painful and more affordable. Uniquely providing the ability to recover applications running on both physical and virtual infrastructure
