

Qolcom Procure

Centralised procurement and control of your mobile devices and Wi-Fi systems

OVERVIEW

Mobile users within a company require different devices, accessories and services to meet their individual mobility needs. You can no longer insist on a standard mobile device, a single mobile platform or a single mobile carrier and continue to operate efficiently and effectively.

While trends indicate that enterprises are facing increasing pressure to allow the use of personal mobile devices for work related activities, most companies will continue to maintain a mix of corporate and personal liable in their mobility environment for the next several years.

Enterprises are looking to implement or streamline multinational employee mobility programs, business enablement initiatives, managed applications, and simplified global device, Wi-Fi and accessory portfolios. Now with Qolcom and GEMA (Global Enterprise Mobility Alliance) we can enable global procurement capability and more services designed for the enterprise market across the entire device lifecycle.

Qolcom is the UK Partner for GEMA, comprising of regional service providers, all experts in their own markets, with local knowledge, language and in-country resource to provide global localised solutions to meet enterprise needs throughout the world, currently distributing devices and providing services across 100 countries in six continents.

Device financing and leasing programs:

Innovative customised financing solutions

Asset Management and reporting:

a process of deploying, operating, maintaining, upgrading, and disposing of assets

End-to-end order request management:

Automation to reduce cost and effort

Qolcom Procure delivers:

- Reverse logistics and end-of-life asset recovery
- Single global procurement and asset management platform
- Approved catalog of devices based on end-user segment
- Multi-currency and multi-lingual support for regional localisation
- Global relationships with multiple OEMs
- End to end order management with hierarchical approval structure
